1. Organisation Overview:

- **DIGITAL CASHFLOW S.A**

- The company was founded by Ofentse Mashiane, a young entrepreneur who identified the opportunity within the expansion of technology to bridge the gap between individuals who rely on traditional sources of income and the increasing opportunities to generate revenue online. Digital Cashflow S.A company was established in 2018 based on economic growth, social development, production of services, innovation, job creation and aiding of big businesses.
- Its mission is mainly generating revenue online, focusing on financial analysis, financial investments, financial trading as well as cryptocurrency. Thus, soon, the company's vision is to create generational wealth and educate individuals how to maintain and further grow their wealth.
- Digital Cashflow S.A. targets individuals who are interested in generating income online and achieving financial independence. This includes young adults, students, unemployed individuals, working professionals looking for additional income streams, aspiring entrepreneurs, and anyone who wants to build, manage, and grow generational wealth through digital opportunities.

2. Website Goals and Objectives:

- The goal of the Digital Cashflow S.A. website is to provide a professional online platform where individuals can learn about opportunities to generate income online, access educational resources, and connect with the company's services. The website will promote the company's vision of creating generational wealth by offering information, training, and guidance on building, maintaining, and growing wealth through digital income opportunities.
- Key Performance Indicators (KPIs): The success of the website will be measured by the number of website visitors, user registrations, customer enquiries, online sales or revenue, and customer satisfaction. These indicators will show whether the website is attracting users, generating income, and helping the company achieve its goal of teaching people how to build and grow wealth online.

3. Current Website Analysis:

- **Strengths:** The website targets private investors, offers investment training, and uses a consistent, systematic approach that builds trust and reliability.
- **Weaknesses:** It may not appeal to people with limited funds, could be difficult for beginners to understand, and requires regular updates to keep investment information relevant to changing market conditions.
- **Areas for Improvement:** The website should include beginner-friendly content to make investing easier to understand, provide more affordable learning options for people with limited funds, and regularly update its investment strategies and educational materials to reflect changes in the financial markets.

4. Proposed Websites Features and Functionality:

- **Home Page** – Introduces Digital Cashflow S.A. and its services.
- **About Us** – Explains the company's mission, vision, and goals.
- **Services Page** – Displays investment opportunities and financial services.
- **Courses Page** – Lists investment and trading lessons available for purchase.
- **Contact Us** – Provides contact details and an enquiry form.
- **Login/Register** – Allows users to create an account and log in.
- **Secure Payment System** – Enables users to pay for courses or services online.
- **Easy Navigation** – Allows users to find information quickly and easily.

5. Design and User Experience:

Overall Design Aesthetic and Branding

Colour Scheme

- **Dark Blue** – Trust and professionalism.
- **Gold** – Wealth and success.
- **White** – Clean and simple design.

Typography

- **Headings:** Poppins Bold.
- **Body Text:** Open Sans.

Layout and Design

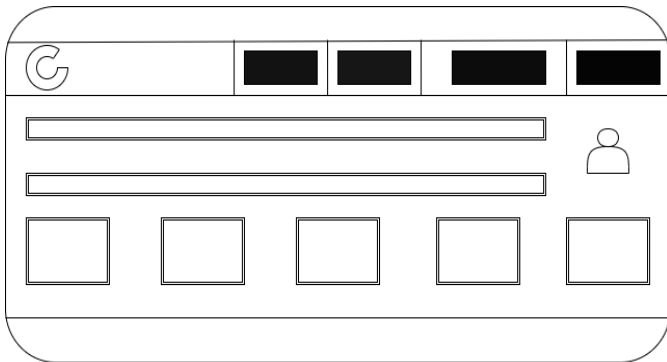

- Modern, clean layout with clear sections and consistent branding.

User Experience (UX)

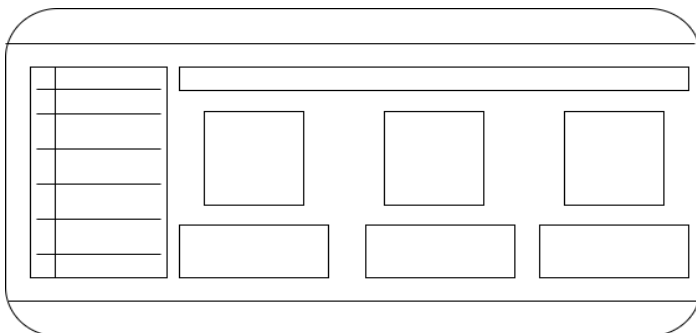

- Easy navigation.
- Mobile-friendly design.
- Fast-loading pages.
- Clear access to services and contact information.

Low-fidelity wireframes

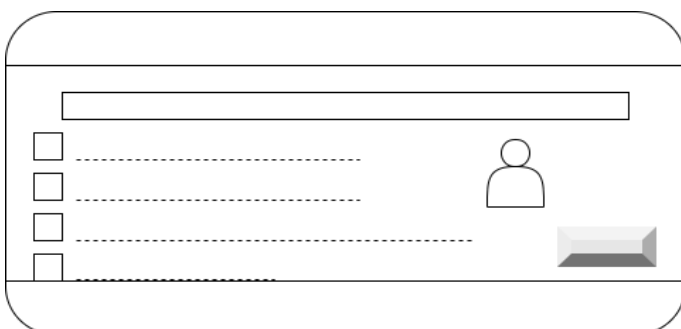

- Home page

- Courses page

- Contact page

6. Technical Requirements:

Hosting and Domain Requirements

- Domain: www.digitalcashflowsa.co.za
- Hosting: Secure web hosting with SSL, reliable uptime, and sufficient storage.

Programming Languages and Frameworks

- HTML – Website structure.
- CSS – Website styling.
- JavaScript – Interactivity.
- Bootstrap – Responsive design.
- PHP & MySQL – User accounts, forms, and database management

TABLE OF CONTENTS

Cover Page	8
Table of Contents	9
1. Organisation Overview	10
2. Website Goals and Objectives	10
3. Current Website Analysis	11
4. Proposed Website Features and Functionality	11
5. Design and User Experience	11–12
6. Technical Requirements	13
7. Timeline and Milestones	13
8. Budget	14
9. References	14

1. Organisation Overview:

- **MUFARISI'S SHOE SHINE BAR**

- This small business started in 2023 in Gauteng, Pretoria by its core founder – Mufarisi Makhuvha. A young business minded guy who saw an opportunity to make an income at an early age of washing people's different kinds of shoes. He started this business to sustain his life because he's still a varsity student. His family played a huge role as stakeholders of funding his business.
- Mission-Statement
To help people look their best by providing reliable, affordable, and high-quality shoe care with friendly service.
- Vision-Statement
To be the first choice for shoe care by building a reputation for quality, trust, and customer satisfaction.
- Target audience is everyone.

2. Website Goals and Objectives:

Website Goals	Website Objectives
– Increase the business's online presence.	– Display all shoe care services and prices clearly.
– Attract new customers through the website.	– Showcase high-quality photos of completed work.
– Improve customer communication.	– Provide contact details, business hours, and location.
– Build trust and promote the business's brand.	– Allow customers to book appointments online.

- Key Performance Indicators (KPIs)

The website's success will be measured by increased website traffic, more online bookings, higher customer enquiries, and positive customer feedback.

3. Current Website Analysis:

Not Applicable. Mufarisi's Shoe Shine Bar does not currently have a website.

4. Proposed Website Features and Functionally:

Features	Functions
Home Page	– Gives a short introduction to the business and its services.
About Us	– Shares information about the business and what it does.
Services	– Shows the services offered and their prices.
Gallery	– Displays pictures of the shoe shine work.
Booking Page	– Let's customers book an appointment online.
Contact Us	– Shows the phone number, business hours, location, and contact form.

5. Design and User Experience:

Overall Design and Branding

The website will have a clean, modern, and professional look that reflects the quality of Mufarisi's Shoe Shine Bar. It will use simple colours, clear text, and high-quality images to create a welcoming and trustworthy brand.

Colour Scheme (Proposed Colour Palette)

The website will use:

- **Black** – for a professional and elegant look.
- **Gold** – to represent quality and premium service.
- **White** – to keep the website clean and easy to read.

Typography (Font Choices and Hierarchy)

- **Headings:** Poppins Bold
- **Subheadings:** Poppins Semi Bold
- **Body Text:** Open Sans Regular

Large headings will be used for page titles, medium-sized text for section headings, and smaller text for paragraphs to make the content easy to read.

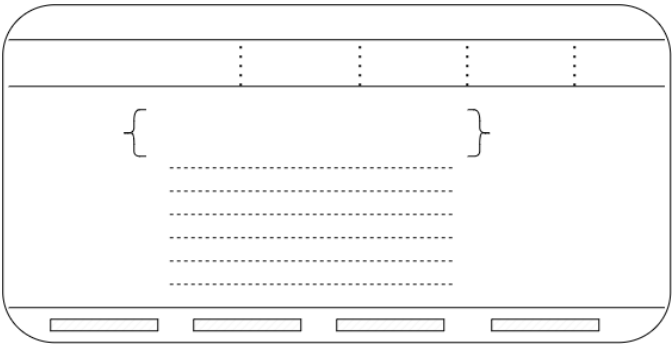

Layout and Design

The website will have a simple layout with a navigation menu at the top. The homepage will introduce the business, followed by sections for services, gallery, booking, and contact information. Images and buttons will be placed neatly to make the website attractive and easy to use.

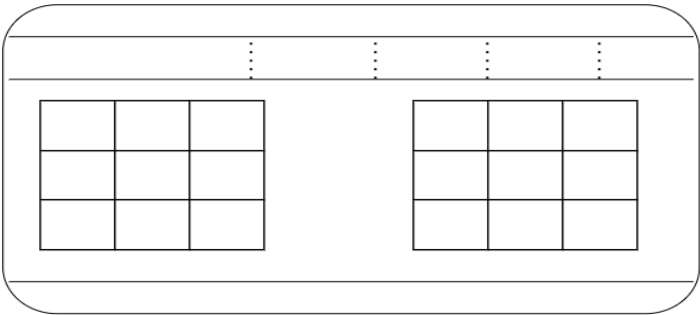

User Experience Considerations

The website will be easy to navigate, with clear menus and well-organised pages. The colour scheme will make the content easy to read, and the website will work well on both computers and mobile phones. Customers will be able to find information and book a service without difficulty.

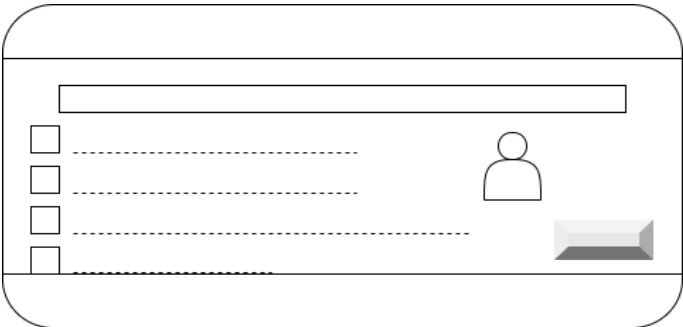

Home page:

Services page:

Contact page:

6. Technical Requirements:

Requirements:	Details:
Front-end	– HTML5, CSS3, and JavaScript
Design Tool	– Figma for wireframes and website design
Responsive Design	– The website will work on computers, tablets, and mobile phones.
Web Browser Support	– Google Chrome, Microsoft Edge, Mozilla Firefox, and Safari
Internet Connection	– Required to access the website and submit bookings.
Hosting	– The website will be hosted on a web server so customers can access it online.

7. Timeline and Milestones:

Date	Project Activity	Milestone/Deliverable
4 August 2026	Submit the project proposal.	Project Proposal Submitted
5–13 August 2026	Conduct research, gather requirements, analyse the existing website, and prepare planning documents.	Planning documentation completed.
14 August 2026	Submit Task 1: Planning Phase.	Planning Phase Submitted
15 August – 17 September 2026	Design the website, create wireframes, and develop the user interface.	Website design completed.
